Flavor & Texture:

- **Sweet & Tart:** Reports highlight a delicious sweet-tart balance, with some finding them much sweeter and less tart than anticipated for a crabapple.
- **Fruity:** They offer good, fruity flavor, making them enjoyable for raw consumption. [🔗](#)

Uses:

- **Fresh Eating:** Ideal for snacking, salads, or just picking off the tree.
- **Cooking:** Also great for applesauce (producing a nice dark pink color) and cider. [🔗](#)

Key Considerations:

- **Summer Apple:** A significant downside is that they are a summer variety and don't keep well for long storage.
- **Variety Matters:** While Winekist is popular, remember that crabapple flavors vary greatly; some are very bitter, but Winekist is a standout for fresh eating. [🔗](#)
